Outline

- Abstract of the Project
- Problem Statement
- Proposed Solution
- System Architecture
- Live Demo of the Project
- Embedded Video of Project
- Conclusion
- Future Scope

Abstract

- This project uses power BI and Microsoft Copilot to analyze banking data.
- Convert complex data into simple visual dashboards.
- Identifies customer patterns, risk levels, and financial trend patterns.
- Expected outcomes: Faster analysis, reduced manual effort, improved accuracy and better decision making.

Problem Statement

- Large banking datasets are hard to manage
- Leads to errors and slow analysis
- Traditional tools lack efficiency
- Impacts managers,employees and customers
- Limited scalability, accuracy and security
- No real time data analysis

Proposed Solution

- Use Power BI and Microsoft Copilot to analyse and visualise banking data efficiently.
- Handle large dataset efficiently.
- Reduced errors and manual work.
- Interactive dashboard with AI insights.
- Faster and smarter decision making.
- More efficient than traditional Excel

System Architecture

Data Input / Source

- Kaggle banking dataset(CSV/Excel)
- Contains 13 columns and 1500 rows
- Fields like full name, country, age, gender,income level etc.

Processing / Analysis

- Data cleaning using Power BI remove duplicates and unwanted data columns
- Data transformation and analysing using charts

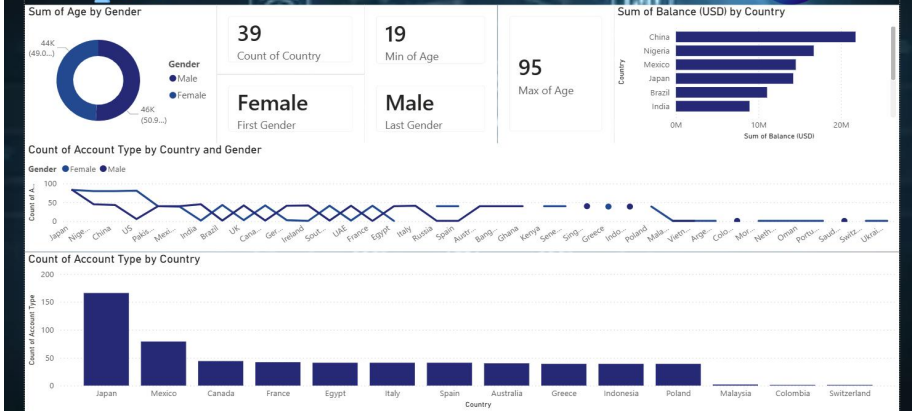
AI / Tool Integration

- Power BI for visualization
- Microsoft corporate for AI insight and summaries

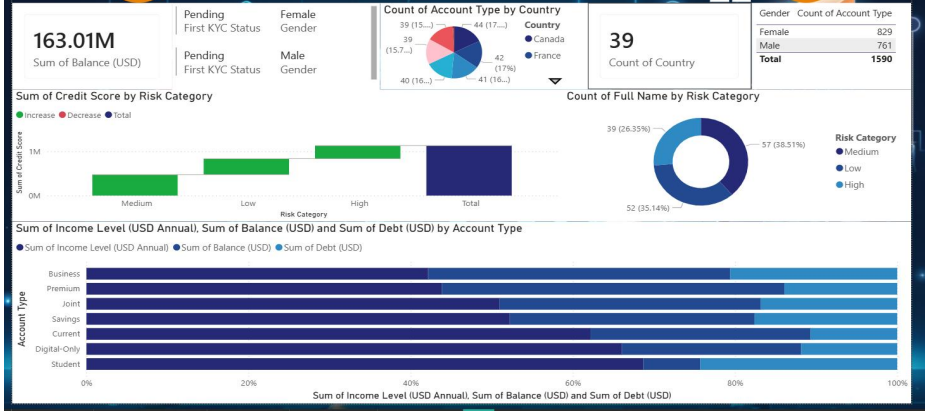
Output / Dashboard

- Interactive dashboards[Pie chart,Bar chat, scattered chart etc.]
- Easy to understand reports for decision making

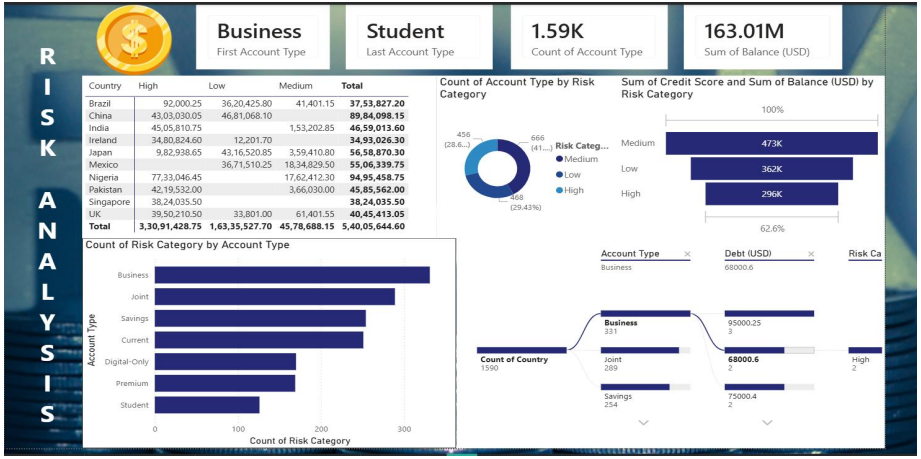
Demographic trend



KPI analysis



RISK ANALYSIS



Country	High	Low	Medium	Total
Brazil	92,000.25	36,20,425.80	41,401.15	**37,53,827.20**
China	43,03,030.05	46,81,068.10		**89,84,098.15**
India	45,05,810.75		1,53,202.85	**46,59,013.60**
Ireland	34,80,824.60	12,201.70		**34,93,026.30**
Japan	9,82,938.65	43,16,520.85	3,59,410.80	**56,58,870.30**
Mexico		36,71,510.25	18,34,829.50	**55,06,339.75**
Nigeria	77,33,046.45		17,62,412.30	**94,95,458.75**
Pakistan	42,19,532.00		3,66,030.00	**45,85,562.00**
Singapore	38,24,035.50			**38,24,035.50**
UK	39,50,210.50	33,801.00	61,401.55	**40,45,413.05**
Total	**3,30,91,428.75**	**1,63,35,527.70**	**45,78,688.15**	**5,40,05,644.60**

Global Banking Customer Analyti

Table: Global Banking Customer Analyti (1,590 rows)

Conclusion

- Used Power BI & Copilot for banking data analysis
- Simplified complex data for better decisions
- Created interactive dashboards (transactions, behavio trends)
- Copilot saved time with quick insights
- Improved efficiency, accuracy, and productivity
- Enhanced skills in data analysis and AI tools

Future Scope

- Integrated real time data in power BI dashboard
- Use advanced copilot feature for deeper AI insights.
- Develop web/mobile dashboard using power BI services
- Expand analysis using larger real world data set

VISION FOR THE FUTURE
